**[1:0] BRAKES PARTS****[1:1] "COMPETIZIONE" brake discs for gr.N and performance cars.**

The "COMPETIZIONE" brake discs are both balancing intern of the outside diameter and the inside of the discs to give the better performance. These discs has high temperature heat treatment no drills no grooved. They're produced to replace the standard O.E. brake rotors.(Group"N" specs.). Are made to be used with High Performance Brake Pads like ferodo Racing, Pagid, Carbon Metal.

### [1:3] Special brake line hoses

A wide range of braided brake line hose kits manufactured from SPEEDFLOW extruded teflon lined hose.

These hoses promote fluid cooling and improved brake pedal feel by eliminating expansion of the fluid galleries due to the heating of the original rubber hose.

The lines are crimped to the swivel union manufactured from white zinc plated steel. We also offer a range of hose fittings either individually or by our boxed workshop kit (includes 10 metres of hose) for assembly in the workshop using olives and reusable hose ends.

**[4:0] COMPONENTS****[4:1] LIGHT wheel spacers**

The wheel spacer "LIGHT", machined from castings, are ideal for road application & are also very cost effective with multiple application ability (4&5 holes). "Competition" spacers are produced on the same digital machinery but from higher grade alluminium bar for individual models. These spacers are anodised to prevent oxydation. Priced in axle sets of 2 pieces. For ease of fitment we may supply a full range of bolts or studs & nuts of [4:2].

**[4:2] NUTS STUDS and BOLTS for wheels**

Wheel studs & bolts are produced from high tensile steel having rolled threads, reducing the risk of fatigue failures. Knowledge from our competition experience has led us to use a dissimilar material of the nut from that of the wheel stud. This plus copper coating of the nut assures security

#### [5:2] A.I.Tech. Special head gaskets

We're particularly proud to provide our customers a wide range of special gaskets for sports cars, racing cars, vintage cars. We can supply gaskets of various thickness and piston diameters from custom-designed shapes and sizes. We can also offer gaskets taken from samples or from design guaranteeing highest quality standards.

The materials used are carefully selected and are chosen from highest technology, guaranteeing maximum resistance and the highest of performance.

**[5:4] ADVANCED INNOVATION TECHNOLOGY Silicone hoses**

Advanced Innovation Technology has now his own silicone hoses production.

These hoses are designed for continuous use in heating and coolant system at temperatures from -60°C+170°C.

The burst pressure range is between 5,6 and 12,7 bars. The recommended working pressure from 2,1 to 4,2 bar (the pressure dependent on shape and size). Finishing colours is shining blue. The straight lengths are of 1 mtr with inside diameter ranging from 6mm to 127mm. Advanced Innovation Technology manufacture include elbow of any angle, reduces, multiple bend, convoluted and corrugated or spiral reinforced hoses: quotations on demand.
