Digital Chronometer with time calculator

The RACE TIME 4 digital chronometer (Code : AIT-RT4) is a highly technological and flexible product, ideal for usage in rally or istic race.

There are 3 stopwatch mode :

- *Normal* : Timer with accuracy : 0.01 sec and max time : 99 Hours
- *Prestart* : The prestart countdown will be shown and when the countdown reaches zero, the stopwatch starts
- *Countdown* : The timer "Beeps" every 10 seconds during the last minute and every second of the last 10 seconds.

Details of 30 drivers can be stored into memory. For every driver the times of 25 stages can be stored. In memory review mode, individual stage times can be adjusted. The adjustment will also affect the cumulative time.

It is possible to make decimal or time (sexagesimal) calculation without prior conversion (i.e 12' 25" 00).

All the times recorded can be displayed or, by means of a connection cable, downloaded to a printer or a PC.

Technical specifications
